Woke?

By Dr. R. Pletsch

Many of you reading this article have heard the term "woke". It has become a term used for all phrases or words that many in the progressive wing of the Democratic party to be wrong or offensive. In fact, they have been named in numerous lawsuits that it denies the basic First Amendment Rights. We in the neighborhood wouldn't see this much, but the people who defend "woke" are not just political activists, they have seemingly influenced many companies and schools to follow what they say -- no questions. If you are using these terms, many com-panies and schools have fired or demoted people. Most people, whether they believe it or not, follow their company's or school's dictates because their job is important to

Some people believe that if you are an elected official or a minority, following "woke" is essential. This is why a recent episode of Lawrence Jones' show was so interesting. It played film segments of a speech by Rep. Cory Bush (D). He then American women, Felicia and Killings Washington. guests were basically saying that all people deserve freedom of freedom thought and freedom of choice and that no one must decide that the other person is racist for not believing everything they do. Ms. Killings and Ms. Washington represented an organization called the Conscious Conscience Movement, which is a large group of professionals that do not believe that because they are Black they must all think exactly the same. They cited stats that over 50% of Black Americans live in suburbia and think differently in many different subjects.

It is hard for some who fought so hard to improve their family's lot to be called "Uncle Toms" and other derogatory slurs because unelected group said they were. I must make it clear that all people who practice "woke" in their lives believe that others who do not follow "woke' are all racists. The quotes have read from their leadership seem to be saying that. Remember at this time in America many families are multiethnic -- if you go back far enough. Many companies, like Ancestry.com, have enlightened many people to realize that almost none of us are of only one ethnic or racial back-ground.

AACR Combats Brain Cancer

The American Association for Cancer Research reports that some 24,810 people in the United States are expected to be diagnosed with brain cancer and other nervous system cancers. Brain and spinal cord tumors are formed by the abnormal growth of cells and may be either benign or malignant. Benign brain and spinal cord grow and press on nearby areas of the brain.

Malignant brain and spinal cord tumors are likely to grow quickly and spread into other brain tissue.

When a tumor grows into or presses on an area of the brain, it may stop that part from working the way it should.

Tumors that start in the brain are called primary tumors that may spread to other parts of the brain or spine. Tumors found in the brain that have started elsewhere in the body are

called metastatic tumors. About half of metastatic brain tumors are from lung cancer.

Father's Day Memories

He knew everything there was to know. Daddy, what makes thunder? Why don't ducks catch cold? How can the sky be blue if the air isn't? And Daddy, is Grandpa in Heaven now?

He could always make things better. He was your very first pal, the first person you played catch with. And when your wild pitch toppled the living room lamp, he took the blame so Mom wouldn't scold you.

You always felt safe with him. When you learned to ride your first bike, he ran alongside supporting you, and you knew he wouldn't let you fall. But then, before you realized it, you were pedaling along all by yourself, leaving Dad behind cheering you on.

And one day, we leave our fathers behind forever.

This Father's Day, our funeral home staff joins you in remembering our fathers, grandfathers, and their fathers, and the legacy of knowledge and history they've given us. May your thoughts this Father's Day recall time of warmth, security and love.
